■ Data / Password Recovery

We offer recovery of deleted files, corrupt hard drives and passwords within a Microsoft environment using market leading recovery tools.

Due to the nature of disaster recovery there is no guarantee for the recovery of a single document or a whole computer and for this reason we offer a no fix-no fee service

■ Disaster Recovery Planning

With experience in planning for these types of failures, we can formulate and test standard operating procedures (SOP) to enable your business to recover with minimum downtime, loss of information and business disruption. As part of our facilities we can recover lost data from damaged hard drives and offer backup strategy and solutions advice.
